NAME OF APPLICANT: Wayne State University, C² Pipeline Program

NAME OF COLLABORATING AGENCY/ORGANIZATION: Wayne State University, College of Nursing

SECTOR(S) THIS AGENCY REPRESENTS:
☒ Education; ☐ Social Services; ☒ Health; ☐ Faith; ☐ Business; ☐ Other (explain) ______

USE THIS SPACE OR ATTACH A LETTER TO DESCRIBE HOW THIS AGENCY/ORGANIZATION WILL COORDINATE AND COLLABORATE IN THE IMPLEMENTATION OF THE PROPOSED 21ST CENTURY COMMUNITY LEARNING CENTERS PROJECT:

The College of Nursing currently sponsors the C2 Pipeline Program, which supports the guiding principles and strategic goals for developing Michigan into a top 10-education state in 10 years. Of the seven goals of the SBE, the C2 Pipeline program helps to address five of these specifically. The project takes a competency-based approach that utilizes S.T.E.M. activities to introduce students to a variety of career options especially in the area of health and/or STEM as well as to prepare them for the transition from high school to college or Career. Activities in the program are aligned to the Common Core Standards, Next Generation Science Standards and focuses on low performing schools that traditionally consist of underrepresented and economically disadvantaged students, which helps to provide equitable resources to meet the needs of all students to ensure that they have access to quality educational opportunities.

The College of Nursing will:

- Participate in the Program Advisory Group, which meets twice a year.
- Assign a contact that will be involved in the Program Steering Committee and other ad-hoc committees.
- Provide and leverage in-kind services and resources.
- Work with students who are interested in health careers.
- Participate in careers fairs.
- Participate in the facilitation of tours within the college.
- Have input into the program activities and offerings during both the school year and summer.
- Support the academic preparation of students to graduate on time and transition to college.
- Assist in securing content area speakers for the students that align to program offerings.
- Be a part of the on campus summer program through C2 Pipeline.

CITY ____________________________ STATE ____________ ZIP CODE ______________
Dear Mr. Neal,

On behalf of the University of Detroit Mercy School of Dentistry, it is with great pleasure and enthusiasm that I write this letter of support for the Wayne State University (WSU) College of Nursing C² Pipeline Program’s application for the 21st Century Community Learning Center (CCLC) grant. The CCLC grant’s purpose is in alignment with the C² Pipeline Program’s and Detroit Mercy Dental’s goals of increasing the numbers of underrepresented (URM) and disadvantaged students that pursue and excel in STEM careers, and producing a health care workforce more reflective of the diversity within the City of Detroit, the State of Michigan, and the U.S. population. Given Detroit’s designation as a Health Professional Shortage (HPSA) and Medically Underserved (MUA) area, the University of Dental Mercy School of Dentistry is uniquely positioned fulfill its mission of “fostering a forward thinking, inclusive learning environment committed to developing competent, socially and ethically sensitive healthcare professionals who are committed to patient care and community wellness.”

As part of our partnership, the WSU C² Pipeline Program and Detroit Mercy Dental will offer a variety of enrichment programs for high school students interested in pursuing a career in the health professions. This will include providing students from Cody High School with a “Careers in Dentistry” presentation and a field trip to Detroit Mercy Dental, creating a new dentistry track within the C² Pipeline Warriors College Experience Interprofessional Education summer camp, and exploring additional opportunities for our current dental faculty and students to get involved with STEM afterschool programming. We will also engage in coordinated efforts to identify and recruit URM and disadvantaged high school students from the Metropolitan Detroit area for our pipeline programs. Detroit Mercy Dental will provide the following forms of support to the WSU C² Pipeline Program to execute the 21st CCLC grant: free use of our facilities, in-kind support from faculty, staff, and students, oral hygiene kits, and donations of equipment and supplies for biomedical sciences, gross anatomy, and dental simulation laboratory activities.

We express our appreciation to the Michigan Department of Education for funding the 21st CCLC program, and to the Wayne State University C² Pipeline Program for its strong commitment to increasing opportunities for URM and disadvantaged students to pursue STEM and health professions careers, and proving safe, nurturing, and enriching afterschool programming.

Best regards,

Rebecca Christensen, M.A., Ed.M., Ph.D.

February 7, 2017

Mr. Don Neal
WSU College of Nursing
5557 Cass Avenue, Room 106
Detroit, MI 48202

Dear Don,

At Center Line High School our staff has been involved in research and visits to places around the country who are currently running career academies for the past five years. These experiences allowed us to successfully launch the Center Line High School Career Academies. We opened the 2016-2017 school year with a ninth grade academy, The Academy of Industry, Technology, and Innovation, as well as The Academy of Health and Human Services.

Our intent is to provide opportunities for learning through projects which integrate multiple contents, as well as experiences which allow our students to demonstrate the ability to apply their knowledge. We have also committed to providing opportunities for all students to build soft skills so that they can successfully communicate and present themselves.

The C2 Pipeline offerings directly align with our Career Academies and provide our students with experiences beyond the school day. The presentations that we were able to see and participate in is in direct alignment to our drive toward competency based learning. The acquisition of knowledge occurs in our classrooms and the activities that we participated in allows application of knowledge. The ability to interact and cooperate with other students further develops necessary communication and leadership skills, leading to competency.

Students in poverty often times have very limited choices. We continuously seek opportunities to offer outstanding experiences for them and believe that the C2 Pipeline is just that. We will support our students in all ways to ensure a successful partnership between Center Line and Wayne State's C2 Pipeline.

Sincerely,

Eve Kaltz
Superintendent

The mission of Center Line Public Schools is to provide all students relevant and challenging learning experiences to inspire success and empower them to be the leaders of tomorrow.

February 7, 2017

To Whom It May Concern:

On behalf of the Warren Woods Public Schools community, we are pleased to support Wayne State University, College of Nursing C² Pipeline Program’s application for the 21st Century Community Learning Center, Cohort J Grant.

There is a great need for quality afterschool programming for at-risk high school students in our community. This grant will increase the number of students who receive tutoring and S.T.E.M. (Science, Technology, Engineering, Math) enrichment activities to expose them to careers in the health field and to help them graduate on time, career and college ready. The program at Warren Woods Tower High School will revolve around the three R’s: Relationships, Rigor and Relevance.

We believe that the C² Pipeline program will help our school make relevant connections for students between what they are learning and how it is preparing them for their future. Warren Woods Tower High School has five academic goals within its school improvement plan: reading, writing, math, social studies and science. We have much work to do to get all of our students to proficiency in all of these areas. In addition, survey results from students indicate that 50% of our students do not agree with the statement: “School has prepared me to live in today’s world.” We believe that this grant will provide our students additional, extended opportunities for academic support through tutoring, paired with enrichment activities in S.T.E.M. These important connections will help us improve student proficiency on our school improvement goals while preparing our students to live in today’s world. Additionally, students who have access to practical afterschool programs increase academic achievement, have a reduction in school truancy and behavior referrals. This program engages high school students and helps them to become self-motivated learners while at the same time demonstrating a connection between the work and what they are doing in their personal and educational lives.

I believe implementing the WSU College of Nursing C² Pipeline Program at Warren Woods Tower High School will provide the support the Warren Woods school district needs to leverage access to higher learning by removing many of the barriers our students experience through this hands-on approach and applicable enrichment activities. It will also allow our students and their families a safe and supportive environment to explore opportunities that, despite our sound fiscal management and implementation, we have been unable to provide outside of our normal school day.

Sincerely,

Stacey Denewirth-Fici
Superintendent

To Whom It May Concern:

The goals of C2 Pipeline Program through Wayne State: Increased on-time high school graduation, college/career readiness, and increased 1st year college retention fit what we need here at Warren Mott High School. The 21st Century Learner has to be focused on creativity, critical thinking, communication and collaboration to prepare them for the future. STEM learning engages and inspires students to learn as well as challenge them in their thinking and application of solving problems. Integrating STEM (Science, Technology, Engineering, and Math) into our curriculum is exciting by incorporating STEM concepts (aligned with the Next Generation Science Standards and engineering concepts), creativity, team building and encouraging interest in Science with project based activities making the learning fun. C2 Pipeline and the coordinator Lisa Christenson have provided this opportunity and culture for our students.

Lisa Christenson’s passion for kids and education is contagious. Under her leadership, children are given every opportunity to learn within the instructional setting of the C2 Pipeline program. Under her supervision, she works to ensure that all children get the optimum experience at whatever school he works at. She is accountable to administration and to district and community stakeholders. Her leadership style is collaborative-consensus building and, when working with peers, she is always a viable contributor to the decision making process. These are ways that C2 Pipeline has fit to the Warren Mott High School Improvement Goals. We are excited to begin the dialogue to achieve the goals of the Warren Mott High School, that students will...

- Build a college-going culture within our school
- Lower systematic barriers preventing students from pursuing college prepared to succeed
- Deliver a comprehensive and coordinated set of college access services to students, particularly those who come from low-income families or who are first in their families to pursue postsecondary education
- Be socially, academically, and financially prepared for postsecondary study by the end of high school
• Enroll in college/trade or vocation within six months of high school graduation
• Complete a college degree or postsecondary credential within six years of high school graduation

Here are some bullet points why the C2 Pipeline Program has been beneficial for our students here at Warren Mott:

• Assistance with standardized test preparation (SAT, ACT, PSAT, full length online practice tests)
• College admission tips and scholarship information
• Monday-Thursday 2.5 hour after school tutoring program
• Site coordinator (who is a WSU employee, salary covered by grant) at Warren Mott. The coordinator will work at Warren Mott during the day. They will collaborate with teachers to make sure the afterschool tutoring program supports classroom learning. Though the site coordinator is a WSU employee, the building principal interviews candidates for the position. WSU hires staff for the C2 Pipeline program.
• Students have the opportunity to participate in summer camps at WSU. The summer camps focus on STEM programs, such as nursing, medical, engineer, and pharmacy. The cost of the summer camp is covered by the grant.
• The grant covers the entire cost of the program.
• Students will also have the opportunity to participate in career enrichment opportunities.
• Students will be able to participate in cultural enrichment opportunities (e.g. trips to the DIA)
• Activities incorporate drug and violence prevention, mediation and conflict resolution, citizenship and leadership development
• Family activities
• This could be a truly life changing opportunity for our students!!

This program has a lasting effect for many of our students. If you have any other questions, please do not hesitate to contact us at (586) 574-3250. We really need this opportunity at our school.

Sincerely,

John Dignan

On behalf of Fitzgerald Athletic Association; we are pleased to support Wayne State University, C2 Pipeline Program’s application for the 21\textsuperscript{st}. Century Community Learning Center, Cohort J Grant.

There is a great need for quality afterschool programming for at-risk high school students in the region. This grant will increase the number of students who receive tutoring and S.T.E.M. (Science, Technology, Engineering, Math) enrichment activities that expose them to careers in the health field and to help them graduate on time and become career and college ready. The programs at these schools will revolve around the three R’s: Relationships, Rigor and Relevance.

The WSU C2 Pipeline goals to provide out of school time College/Career ready programs that incorporate S.T.E.M in a project based, hands on learning environment. Students, who have access to constructive after school programs increase academic achievement, have a reduction in school truancy and behavior referrals. This program engages high school students and helps them to become self-motivated learners while at the same time demonstrating a connection between the work and what they are doing in their personal and educational lives.

I believe implementing the WSU C2 Pipeline Program in Fitzgerald High School will provide the support the Fitzgerald Public School’s need to leverage access to higher learning by removing many of the barriers students experience through proactive outreach and relevant enrichment activities. It will also allow the students and their families a safe and supportive environment to explore opportunities they may not otherwise have access to.

Fitzgerald Athletic Association pledges our continuing support to Fitzgerald High and its students by providing supplemental funding for opportunities in athletics and student initiatives. We look forward to a strong partnership with WSU and the C2 Pipeline Program.

Sincerely,

Laura Victory
Fitzgerald Athletic Association
