## Welcome

On behalf of the C2 Pipeline staff, we would like to thank you for taking time to attend our 2<sup>nd</sup> Annual WSU C2 Pipeline Warriors College Experience, Project Display and Gala.

The students have spent 11 days/nights here on the campus of Wayne State University exploring health careers, performing community service, and working on our version of an Interprofessional Team (IPE). Their task was to take what they learned in various specialties utilizing specially designed curriculum, taught by faculty. The student IPE teams developed a project that addressed Diabetes within their family, school or community.

Students had the opportunity to experience college life and participate in activities to better prepare them to become "college and career" ready. Not only did they learn about the opportunities here at Wayne State University, they were able to experience the Detroit area. Each student's experience led them down different paths. All had to cope with what many new college freshmen encounter. Challenges included dorm living with others they had never met, working in teams with other students from diverse backgrounds, the art of compromise and being able to experience various pressures that many college freshman face.

We would like to especially thank the participating schools/colleges here at Wayne State University for the work and support they have given to the project over the past two years from the planning to implementation phase. It is through their efforts that we have been able to create this one of a kind college and career ready experience.

Last year our theme was based on the Starfish Story, this year it is "Team Performance". Although there are thousands of students in the Metro Detroit area, and the task of making a difference is enormous, as a team, we must continue our mission and outreach efforts because for each student we come in contact with we have the potential to make a difference with that one student.

### *Team Performance*

*Together gears perform tasks at a rate that makes machines run quicker, smoother and more efficiently. As a team of gears works in unison behind the scenes, they are moving in different directions and at different speeds; linked together they each have their own responsibility, but the same goal.*

*Everyone that has participated in the 2<sup>nd</sup> Annual WSU C Pipeline Warriors College Experience is an integral part of this team, allowing us to work better together and in turn driving us to success.*
